

Celebrations of Women in Computing

These lively local events showcase female role models, encourage mentoring and networking, hold computing career fairs and panel sessions, and create opportunities for undergraduate and graduate students to present their research and special projects through poster competitions and presentations. More than 25 celebrations throughout the US and world inspire women to excel in their chosen field--find one near you or start a new one!

Join us!

When you join ACM, or renew your membership, check the box for ACM-W. You will be added to our email list and join the 36,000 people who receive our *ACM-W Connection* newsletter.

ACM-W supports, celebrates, and advocates internationally for the full engagement of women in all aspects of the computing field, providing a wide range of programs and services to ACM members and working in the larger community to advance the contributions of technical women.

Chapters

ACM-W chapters build a support network for students at schools worldwide and provide leadership opportunities in a nurturing atmosphere that can include social activities, games, competitions and awards, talks by visiting lecturers, and more. Chapters also encourage people to join the association for computing professionals, early in their careers. Find one of our more than 100 chapters or start a new one!

Student scholarships to attend research conferences

For women undergraduate or graduate students in computer science and related programs, this exposure to the computer science research world can encourage them to continue on to the next level, whether it's Undergraduate to Graduate, Masters to Ph.D., or Ph.D. to an industry or academic position. There are 6 award cycles per year, with travel stipends of \$600 or \$1,200 depending on conference location. This can be supplemented by the student's home department or a Special Interest Group if it's a SIG conference.

Athena Lecturer Award

Named after Athena, the Greek goddess of wisdom, this annual award celebrates outstanding women researchers who have made fundamental contributions to computer science. Speakers are nominated by SIG officers. The Athena Lecturer gives a one-hour invited talk at an ACM conference chosen by the speaker and the nominating SIG. Learn more about prominent women computer scientists honored by ACM and ACM-W.
